More detailed information on operating expenses is provided within Section 1 – Pages 1 through 3.

The total cost per million gallons is \$3,289 based on flows of 184 million gallons per day. This is \$158 per million gallons, or 4.6 percent less than the budgeted cost per million gallons per day. A further description of these costs and benchmarking with other agencies is contained within Section 1 – Pages 6 through 8.

• **Treasurer's Report**

This section reports on financial portfolio performance with respect to OC San's funds. Both Long-Term and Liquid Operating Portfolios are summarized. The report also contains information on the national economic outlook from OC San's money manager, Insight Investment (Insight).

Insight notes the Long-Term Portfolio quarterly return of 213 basis points outperformed the ICE BofA 1-5 Year AAA-A US Corp & Govt Index return of 200 basis points, while the Liquid Operating Portfolio quarterly return of 112 basis points outperformed the ICE BofA 3-Month US Treasury Bill Index return of 102 basis points.

Economic Review and Outlook

Insight further notes the first quarter of 2025 was centered around the effects and intentions of the new US administration, as Donald Trump resumed the presidency, with announcements introducing material economic and market uncertainty. The on/off imposition of import tariffs on US trade partners became a focus for many market participants as they attempted to identify the path forward for global economies, central bank actions and markets generally. The ongoing US policy pivots have heavily influenced policy pronouncements in many other

---

countries, not least in Europe, where greater government commitments to spending on defense have been pushed up within domestic agendas.

The US Federal Reserve was alone among the major central banks in not changing interest rates, with the European Central Bank, the Banks of England and Canada, the Swiss Central Bank, and the Reserve Bank of Australia all cutting rates, while the Bank of Japan raised rates during the quarter. The Fed held interest rates unchanged throughout the quarter as economic data remained mixed. Inflation rose in January but then moderated, with the headline rate ending at 2.4%. Although progress on reducing the core inflation rate is slow, it fell back to 2.8%, which is the lowest level in almost four years.

In the labor market, the economy continued to add jobs while wage growth moderated to 3.8% per year for average hourly earnings. The unemployment rate finished the first quarter at 4.2%. However, immediate effects of the layoffs driven by the Department of Government Efficiency (DOGE) may begin to be apparent.

While it is not clear what the full effects of the new administration's policies will be, the imposition of tariffs could see some switch in demand to domestically produced goods, as well as some relocating of production into the US. However, it is also not clear what effects any reciprocal tariffs imposed by trade partners could have on US exports. Either way, it seems reasonable to assume that the slow descent of inflation towards the 2% target level will not be helped by tariffs.

The effects from tariffs and resulting degradation in confidence puts the US economy at greater risk for a slowdown. Insight believes growth will be less than 2% this year and may decelerate further in 2026. Meanwhile, the progress on inflation is expected to stall, migrating back towards 3% from the more-benign current levels.

The Federal Reserve, having cut rates by 100bp in the second half of 2024, is likely to retain its cautious approach. Insight estimates just two rate cuts of 25bp in the remainder of 2025. If downside risks to the economy should emerge, Insight's view is that the Fed will respond to a deteriorating labor market and look through the tariff-induced shock to inflation. Notwithstanding this risk to higher inflation, Insight believes the prospect of softer growth ahead will see US Treasury yields fall back over the course of the next year.

### Market Review and Outlook

Government bond markets were mixed during the first quarter. News, events and reactions were largely centered on the announcements and policies of the incoming Republican administration. Concerns that the US might be more exposed to recession through the imposition of tariffs helped push 10-year US Treasury yields lower by 36 basis points (bp). Treasury yields at the front-end of the curve remained stable.

Political developments also exerted considerable influence on credit markets. The option-adjusted spread (OAS) over governments for the Bloomberg US Corporate Index ended the quarter 14bp wider at 94bp. Despite the uncertainty,

many corporates have strong fundamentals, and the high absolute level of yields should draw investors towards credit markets. Insight expects issuance to remain elevated through the first half of 2025 as corporate treasurers seek to take advantage of demand.

After a strong start to the year, US asset-backed securities markets experienced some volatility as the threat of tariffs weighed on US consumer confidence. However, demand showed little sign of waning, with buyers quickly emerging to take advantage of spreadwidening opportunities. Spreads appear attractive relative to similarly rated corporate credits, and Insight's preference remains for issues with seniority in the capital structure and robust features that divert cashflow in the event of underperformance in the underlying asset pool. Strong underwriting and servicing policies may also act to insulate investors if the economy unexpectedly weakens.

In an increasingly uncertain environment, investors can find reassurance in the substantial reserves and cash balances accumulated by state and local governments over recent years. Insight believes these reserves should enable issuers to navigate periods of softer economic conditions. At a sector and issuer level, Insight sees significant opportunities for relative value trades. Airports and toll roads generally offer good value, while mass-transit systems remain challenged due to the number of workers still operating remotely. Insight continues to favor essential utilities such as public power and water providers over state obligations. These utilities typically benefit from stable revenue streams and predictable cashflows.

**Comparison of Third Quarter Cost per Million Gallon Results with Budget Last Five Years**

As demonstrated in the preceding graph for the current and each of the last four fiscal years, the cost per million gallons at the end of the third quarter has been between 5.8 percent lower and 1.1 percent higher than the annual budget. The FY 2024-25 third quarter cost per million gallons of \$3,289 is 4.6 percent lower when compared with this year's budget. The increase in cost per million gallons of \$283 from the previous year is primarily due to an increase in operating expenses, which are 4.8 percent higher than the same period last year, and by a decrease in flows, which are 4.2 percent lower than the same period last year. Staff believes that overall operating costs will be at or slightly below budget at year-end.

**The total cost per million gallons at March 31 is \$3,289 based on flows of 184 million gallons per day.** This is \$158 per million gallons, or 4.6 percent less than the budgeted cost per million gallons of \$3,446. The lower cost per million gallons is due to net expenses being 4.8 percent lower than the proportionate budget through March 31, partially offset by flows of 184 million gallons per day being 0.4 percent lower than the budgeted flow of 185 million gallons per day, which has an inverse relationship to the cost per unit of collection, treatment, and disposal.

More detailed information on operating revenues, costs, and related information is provided within Section 2.

# Consolidated Financial Reports

Following are data tables showing the last five years of Single Family Residential User Fees (SFR) and the cost per million gallons (MG) to collect, treat, and dispose of wastewater for the Orange County Sanitation District and similar agencies. The agencies used in the tables were determined to be those that most closely resembled OC San in terms of services provided and treatment levels. The summaries demonstrate that OC San's SFR and cost per MG are each one of the lowest in their respective groups.

## Capital Outlay Review:

**As depicted by the preceding chart, Capital Outlays totaled \$150.6 million, or 67.5 percent of the capital outlay cash flow budget for FY 2024-25 as of March 31, 2024.** While the overall expenditures for the Capital Improvement Program are tracking with the proportionate budget through the third quarter, individual projects may experience significant fluctuations due to the various stages they are in throughout the year. The most significant deviations from the 75.0 percent target at March 31 include 5-67 Bay Bridge Pump Station Replacement and 2-72 Newhope-Placentia Trunk Replacement, which are over the proportionate budget by \$14.4 million and \$7.5 million, respectively, and 7-65 Gisler Red-Hill Interceptor & Baker Force Main Rehabilitation and P1-105 Headworks Rehabilitation at Plant No. 1, which are under the proportionate budget by \$9.5 million and \$5.6 million, respectively. **Overall, the capital outlay costs of the capital improvement program are expected to approximate \$213.2 million, or 95.6 percent of the capital outlay cash flow budget at year-end.**

More detailed information on the capital improvement program is provided within Section 3.

**Capital Assets Schedule and Debt Service Budget Review:** Section 4 is the Capital Assets Schedule and Debt Service Section. This section shows the cost value of OC San's capital facilities at March 31, 2025, as well as the debt service costs resulting from the need to provide funding for the construction of capital facilities.

Principal payments on debt issues are due in February, during the third quarter of each fiscal year. As of March 31, 2025, principal payments of \$34.1 million, or 100.0 percent

## **STAFF REPORT**

Treasurer's Report  
For the Period Ended March 31, 2025

---

### **SUMMARY**

Section 18.0 of the Orange County Sanitation District's (OC San) Investment Policy includes quarterly reporting requirements for OC San's two investment portfolios. These two funds, the "Liquid Operating Monies," and the "Long-Term Operating Monies" are managed by Insight Investment (Insight), OC San's external money manager.

The ongoing monitoring of OC San's investment program by staff and Callan LLC (Callan), OC San's independent investment advisor, indicates that OC San's investments are in compliance with OC San's adopted Investment Policy and the California Government Code, and that overall performance has tracked with benchmark indices. In addition, sufficient liquidity and anticipated revenues are available for OC San to meet budgeted expenditures for the next six months. OC San's portfolios do not include any reverse repurchase agreements or derivative securities.

### **ADDITIONAL INFORMATION**

#### **Performance Reports**

The Quarterly Investment Report, prepared by Insight, and the Investment Measurement Service Quarterly Review, prepared by Callan, as of March 31, 2025, are attached for reference. The Liquid Operating portfolio, with an average maturity of 110 days, consists entirely of high quality fixed income investments consistent with OC San's investment policy. Also included within the attachments are:

- Performance results in comparison with the ICE BAML 3-month treasury bill index for the liquid operating portfolio; and the ICE BAML Corp./Govt. 1-5 Year Bond index for the long-term portfolio as identified in the investment policy.
- A listing of individual securities held at the end of each reporting period.

MARCH 2025

# ORANGE COUNTY SANITATION DISTRICT (OC SAN) QUARTERLY REVIEW

## ECONOMIC REVIEW & OUTLOOK

The first quarter of 2025 was centered around the effects and intentions of the new US administration, as Donald Trump resumed the presidency, with announcements introducing material economic and market uncertainty. The on/off imposition of import tariffs on US trade partners became a focus for many market participants as they attempted to identify the path forward for global economies, central bank actions and markets generally. The ongoing US policy pivots have heavily influenced policy pronouncements in many other countries, not least in Europe, where greater government commitments to spending on defense have been pushed up within domestic agendas.

The US Federal Reserve was alone among the major central banks in not changing interest rates, with the European Central Bank, the Banks of England and Canada, the Swiss Central Bank, and the Reserve Bank of Australia all cutting rates, while the Bank of Japan raised rates during the quarter. The Fed held interest rates unchanged throughout the quarter as economic data remained mixed. Inflation rose in January but then moderated, with the headline rate ending at 2.4%. Although progress on reducing the core inflation rate is slow, it fell back to 2.8%, which is the lowest level in almost four years.

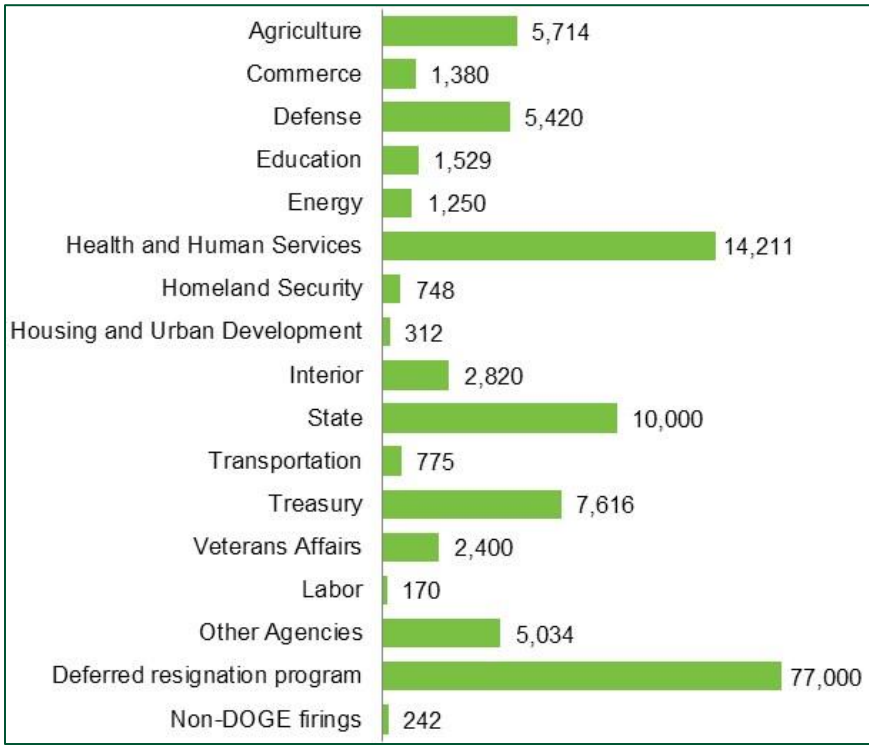

Figure 1: Inflation outside of shelter is near Fed's target (% year over year)<sup>1</sup>

In the labor market, the economy continued to add jobs while wage growth moderated to 3.8% per year for average hourly earnings. The unemployment rate finished the first quarter at 4.2%. However, immediate effects of the layoffs driven by the Department of Government Efficiency (DOGE) may begin to be apparent.

<sup>1</sup> Source: Bureau of Labor Statistics, as of April 10, 2025.

Figure 2: Federal government layoffs by department<sup>2</sup>

While it is not clear what the full effects of the new administration’s policies will be, the imposition of tariffs could see some switch in demand to domestically produced goods, as well as some relocating of production into the US. However, it is also not clear what effects any reciprocal tariffs imposed by trade partners could have on US exports. Either way, it seems reasonable to assume that the slow descent of inflation towards the 2% target level will not be helped by tariffs.

The effects from tariffs and resulting degradation in confidence puts the US economy at greater risk for a slowdown. We believe growth will be less than 2% this year and may decelerate further in 2026. Meanwhile, the progress on inflation is expected to stall, migrating back towards 3% from the more-benign current levels.

<sup>2</sup> Source: Challenger. Gray and Christmas, Layoffs, as of April 3, 2025.

<sup>3</sup> Source: University of Michigan, as of April 11, 2025.

The Federal Reserve, having cut rates by 100bp in the second half of 2024, is likely to retain its cautious approach. We estimate just two rate cuts of 25bp in the remainder of 2025. If downside risks to the economy should emerge, our view is that the Fed will respond to a deteriorating labor market and look through the tariff-induced shock to inflation. Notwithstanding this risk to higher inflation, we believe the prospect of softer growth ahead will see US Treasury yields fall back over the course of the next year.

## MARKET REVIEW & OUTLOOK

### Governments

Government bond markets were mixed during the first quarter. News, events and reactions were largely centered on the announcements and policies of the incoming Republican administration. Concerns that the US might be more exposed to recession through the imposition of tariffs helped push 10-year US Treasury yields lower by 36 basis points (bp). Treasury yields at the front-end of the curve remained stable.

Figure 4: Comparative historical US Treasury yield curves<sup>4</sup>

### Investment Grade Corporate Credit

Political developments also exerted considerable influence on credit markets. The option-adjusted spread (OAS) over governments for the Bloomberg US Corporate Index ended the quarter 14bp wider at 94bp. Despite the uncertainty, many corporates have strong fundamentals, and the high absolute level of yields should draw investors towards credit markets. We expect issuance to remain elevated through the first half of 2025 as corporate treasurers seek to take advantage of demand.

### Structured credit / Secured finance

After a strong start to the year, US asset-backed securities markets experienced some volatility as the threat of tariffs weighed on US consumer confidence. However, demand showed little sign of waning, with buyers quickly emerging to take advantage of spread-widening opportunities. Spreads appear attractive relative to similarly rated corporate credits, and our preference remains for issues with seniority in the capital structure and robust features that divert cashflow in the event of underperformance in the underlying asset pool. Strong underwriting and servicing policies may also act to insulate investors if the economy unexpectedly weakens.

### Municipal bonds

In an increasingly uncertain environment, investors can find reassurance in the substantial reserves and cash balances accumulated by state and local governments over recent years. We believe these reserves should enable issuers to navigate periods of softer economic conditions. At a sector and issuer level, we see significant opportunities for relative value trades. Airports and toll roads generally offer good value, while mass-transit systems remain challenged due to the number of workers still operating remotely. We continue to favor essential utilities such as public power and water providers over state obligations. These utilities typically benefit from stable revenue streams and predictable cashflows.

## LONG TERM PORTFOLIO

The Long Term portfolio further increased the duration and maturity profile relative to the benchmark index. Portfolio duration extended from 2.57 years to 2.67 years to end the quarter. This long duration bias relative to the passive benchmark contributed to excess returns as Treasury yields fell.

Alternatively, corporate and credit-related fixed income investments underperformed like-duration Treasuries. At issue for the “spread sectors” is the increasing federal policy uncertainty and growing risks concerning recession. Corporate yield spreads to Treasuries widened to compensate for these growing economic concerns, which could lead to increasing risks to ratings downgrades. The Long Term portfolio maintains an exposure to corporate securities of 24% versus a policy limit of 30%.

As discussed during the February annual review, the next step for the Long Term portfolio was to build-in a better yield advantage versus the passive benchmark. This process was largely achieved during the quarter. The effort to increase yields focused on AAA-rated ABS and US agency MBS as investment grade corporate yield spreads were near historical lows and did not provide enough compensation for a change in economic outlook. The challenge, as was also discussed, is that recessionary fears can lead to further underperformance for the spread sectors. The Long Term portfolio remains well-positioned to add corporate securities again at more attractive yield spreads, and as the market adjusts to the changing economic environment.

## LIQUID OPERATING PORTFOLIO

OC San withdrew \$22 million from the Liquid Operating portfolio in the beginning of January, and then contributed \$29 million by month's end, resulting in a net contribution of \$7 million during the quarter. Estimated cash flows predict a sizeable contribution at the end of April, followed by monthly withdrawals through the summer. Less cash flow activity and the expectation for a contribution allowed the portfolio to "term out" maturities during the quarter. This resulted in a duration extension to 0.30 years from 0.23 years for the quarter.

Yields on US-supported supranational agencies remain discounted to US agency and commercial paper offerings. While we recently outlined the credit protections afforded to supranational investors, federal policy unpredictability has heightened, leading us to pause further reinvestment in this sector. The upcoming April contribution will be well-timed as yield spreads have widened substantially. However, cash matching and an ample allocation to Treasury bills will be required to mitigate the growing illiquidity risks observed in all markets.

**Past performance is not indicative of future results. Investment in any strategy involves a risk of loss which may partly be due to exchange rate fluctuations.**

The performance results shown, whether net or gross of investment management fees, reflect the reinvestment of dividends and/or income and other earnings. Any gross of fees performance does not include fees and charges and these can have a material detrimental effect on the performance of an investment. The performance shown is for the stated time period(s) only.

Any target performance aims are not a guarantee, may not be achieved and a capital loss may occur. Funds which have a higher performance aim generally take more risk to achieve this and so have a greater potential for the returns to be significantly different than expected. Investments are subject to risks, including loss of principal. There can be no guarantee that any investment strategy will meet the liability funding needs of a particular client.

Performance information for certain accounts may reflect performance achieved while the account was managed at a prior firm. In addition, the performance and customized benchmark information for these periods are based on Information from 3<sup>rd</sup> parties that Insight believes to be accurate, but Insight has not independently verified such information and no representation is made regarding its accuracy or completeness.

The quoted benchmarks do not reflect deductions for fees, expenses or taxes. These benchmarks are unmanaged and cannot be purchased directly by investors. Benchmark performance is shown for illustrative purposes only and does not predict or depict the performance of any investment. There may be material factors relevant to any such comparison such as differences in volatility, and regulatory and legal restrictions between the indices shown and the strategy.

Any currency conversions performed for this presentation, use FX rates as per WM Reuters 4pm spot rates, unless noted otherwise.

Funds and portfolios with an ESG objective follow a sustainable or ESG related investment approach, which may cause them to perform differently than funds that are not required to integrate sustainable investment criteria when selecting securities. Funds and portfolios with no ESG objective are not required to integrate sustainable investment criteria when selecting securities so any ESG approach shown is only indicative and there is no guarantee that the specific approach will be applied across the whole portfolio.
